Bhopal, Madhya Pradesh

PROFESSIONAL SUMMARY

Motivated B.Tech student specializing in Artificial Intelligence & Data Science with a strong foundation in Java, web technologies, and problem solving. Hands-on experience in building database-driven applications and a solid understanding of data structures, backend concepts, and frontend development. Seeking a technical role where I can contribute to real-world software development and grow as an engineer.

EDUCATION

Lakshmi Narain College of Technology

B.Tech in Artificial Intelligence and Data Science ; CGPA: 7.5

Sept 2023 – June 2027

Bhopal, MP

PROJECTS

StockX – Real-Time Stock Trading Platform

- Built a full-stack stock trading platform enabling virtual buy/sell orders with secure user authentication and responsive dashboards.
- Integrated API to fetch live stock prices and developed interactive candlestick/price charts for **real-time market visualization**.
- Implemented **dynamic watchlist** and **portfolio management** with persistent state handling and optimized React component architecture.

Wanderlust – Airbnb Style Full Stack Web Application

- Built a full-stack property rental platform using Node.js, Express, MongoDB, and EJS with secure user authentication (Passport.js).
- Implemented property listings, bookings, image uploads (Cloudinary + Multer), and **server-side validation** using Joi.
- Integrated Google Maps API for dynamic property location **visualization** and managed scalable sessions using MongoDB store.

SwasthyaSaathi – Smart Health Tracker

- Developed a full-stack Smart Health Tracker using the MERN stack, enabling users to securely record and monitor daily health metrics.
- Built responsive dashboards with interactive **data visualizations** (weight, BP, steps) using React and Recharts for real-time health insights.
- Designed and integrated scalable RESTful APIs and MongoDB schemas to support efficient CRUD operations and **persistent** health data management.

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript
- **Frontend Development:** HTML, CSS, Tailwind CSS
- **Backend Development & Databases:** Node.js, Express.js, REST APIs, MySQL, MongoDB
- **Tools & Platforms:** Git, GitHub, Postman
- **Course :** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, Database Management Systems
